Our Services:

Get a **SYMSYS MAN™** in to consult you on and 'MAN'age all you server and networking needs. Whether you have a Linux, BSD, Unix or Windows server **SYMSYS®** can take care of it for you. We have Cisco certified engineers. VOIP and unified communications to Network Security and Network Architecture.

SYMSYS POST™ provides practical tailored Point of Sale solutions with minimal outlay. Track your stock both in and out with minimum fuss and maximum control. We can supply the equipment, set it up with a custom interface and provide training. We can also offer support and on-going maintenance that can save you a fortune!

SYMSYS PROGS™ can customise your code or tailor make programs for specific needs including programs to aid network functionality, office addons, crystal reports and web applications in any of the main languages. We have a team of qualified coders at our disposal for all your programming needs.

SYMSYS TECH™ continues to provide Practical IT Solutions from new systems, to networking and general maintenance for both home and business. We can custom build your system as well as supply and configure anything from server hardware to a USB cable.

SYMSYS WEB™. We use clean, hardy W3C compliant code making your site cross browser and search engine friendly. You can have your site custom designed by our Graphic Designer so it will not only be functional but professionally enhanced to suit your target market.

SYMSYS DESIGN™ is built on the evident need for designers with real technical know-how and a full appreciation for the IT industry. We can professionally design your corporate logo / identity, brochures and packaging. We create from concept to finished artwork for on screen and various print applications.

Introducing SYMSYS®

True to our Expertise ...

The SYMSYS® family of expertise uniquely combines both the Technical and Creative industries making us the best possible choice to take care of your graphics, branding and web design, as well as your general and specialist IT needs.

It takes more than simply a 'can do' attitude to offer such a wide variety of services. Basically, if we know we can do it, we will, and if we can't we won't. Many areas of expertise overlap, therefore a multi-discipline company like SYMSYS® has clear benefits.

The ability to handle a project in more ways than one gives seamless integration to your existing setup or how you want your business and systems to work. Make life simple and less costly, stay 'all round' and well moulded.

We are here to help you Boldy Go... not Blindly Go... therefore SYMSYS® LTD will give you an honest and up front appraisal strongly rooted in customer service and satisfaction for results that last.

A non exhaustive brief of services we can offer are outlined on the left which include Server Management, IT supply, maintenance and support, web and programming services and professional graphic design. We invite you to contact SYMSYS® to find out how we can benefit you.

Call **09 813 0043** or **021 026 23335** or visit our website contact page on: **www.symsys-it.co.nz** where we are happy to return your interest.

We hope to provide more winning solutions with you soon.

Kindest Regards

The SYMSYS® Team
